

SLIP LINING CASE HISTORY

Sewer Rehabilitation From Perco

Client: Galliford Costain/United Utilities

Project: Slip Lining, Northwich, Cheshire

Sub-contractor: Perco Engineering Services

Working with main contractor Galliford Costain, Perco installed two 450mm diameter pumping main pipes in Northwich, Cheshire.

The parallel mains ran through a residential area and close to a school and other local services.

To minimise disruption to local residents and to maintain services, the first main pipe had to be installed and commissioned separately before work could begin on the second pipe.

The project which took twelve weeks, was part of a wider programme by United Utilities to upgrade sewers and Waste Water Treatment Works in the Northwich area.

For more information regarding this project please contact our Sales Director Nick Sheehan on 01604 590200
